

Telecoms fibre site

Cabin, compound and associated ductwork

CASE STUDY

Co-ordination and management of new fibre site design and build - Birmingham.

- Attend site and carry out a full survey of proposed areas.
- Produce general arrangement and planning drawings of the proposed installation, based upon client requirements, site topography and existing services.
- Liaise with client and cabin manufacturer/s.

- Produce full specifications and design details for all associated works, including cabin & foundations, fencing and ductworks.
- Assist with the co-ordination and planning of the build programme.
- Production of handover pack including as-built drawings and snag inspection report.

2 Charnwood House,
Marsh Road, Bristol BS3 2NA

Images are used for indicative purposes only. While every care is taken to ensure that the most faithful representation of the proposed installation is depicted, the accuracy of the placement, scale or colour cannot be guaranteed.
